Re: ET Docket No. 08-59, Amendment of the Commission's Rules to Provide
Spectrum for the Operation of Medical Body Area Networks

Dear Ms. Dortch,

Philips Healthcare ("Philips"), GE Healthcare ("GE"), the Aerospace and Flight Test Radio Coordinating Council ("AFTRCC"), and the American Society for Healthcare Engineering of the American Hospital Association ("ASHE") hereby submit the attached correction to their draft rules filed with the Commission in this docket on January 27, 2012.

This correction results from our earlier agreement with the Wireless Communications Association International, Inc. ("WCAI") as submitted to the Commission in this docket on January 28, 2011.¹ The agreed change was inadvertently dropped from the draft rules most recently submitted to the Commission. We continue to support the changes set forth in WCAI's January 28, 2011 letter and as set forth in the attachment to this letter.

¹ See Letter submitted in Docket 08-59 by Paul J. Sinderbrand, Counsel to the Wireless Communications Association International, Inc., dated January 28, 2011.

ATTACHMENT

§ 95.1601 Scope.

This part sets out the regulations governing operation of Medical Body Area Network Services (“MBANS”) devices on a secondary basis ~~to aeronautical mobile telemetry (“AMT”)~~ in the 2360-2390 MHz and 2390-2400 MHz bands.

< >

1. NON-FEDERAL GOVERNMENT (NG) FOOTNOTES

US276 Except as otherwise provided for herein, use of the band 2360-2395 by the mobile service is limited to aeronautical telemetering and associated telecommand operations for flight testing of aircraft, missiles or major components thereof. The following three frequencies are shared on a co-equal basis by Federal and non-Federal stations for telemetering and associated telecommand operations of expendable and reusable launch vehicles, whether or not such operations involve flight testing: 2364.5 MHz, 2370.5 MHz, and 2382.5 MHz. All other mobile telemetering uses shall not cause harmful interference to, or claim protection from interference from, the above uses.

The 2360-2395 MHz and 2395-2400 MHz bands also are allocated on a secondary basis for fixed and mobile use limited to Medical Body Area Network Service (MBANS) devices. MBANS devices are authorized by rule on the condition that they do not cause harmful interference to, and must accept interference from, stations authorized to operate on a primary basis ~~in these bands~~.
